

Revitalizing multifunctional Mediterranean agrosilvopastoral systems using dynamic and profitable operational practices

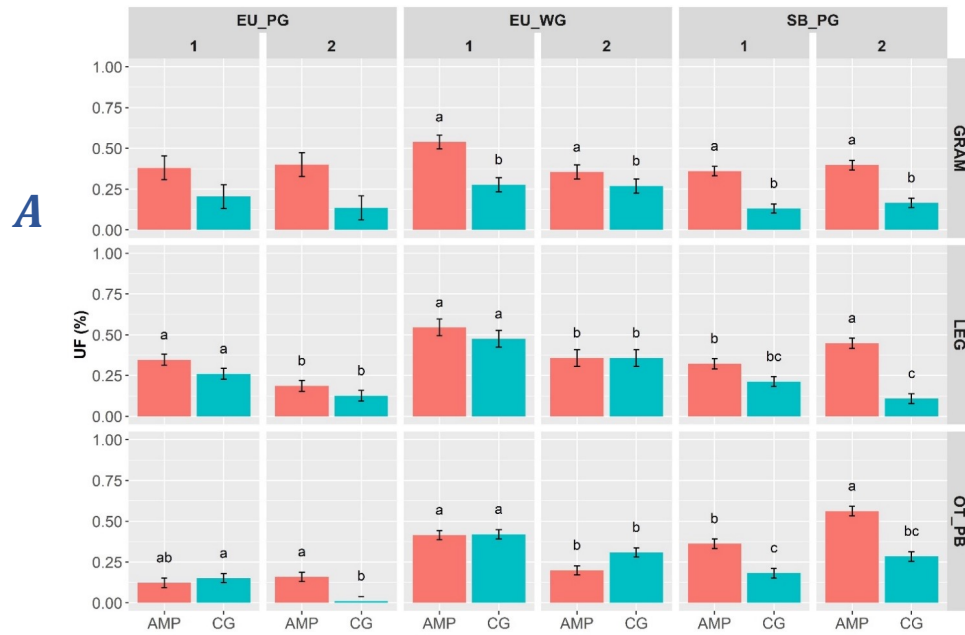

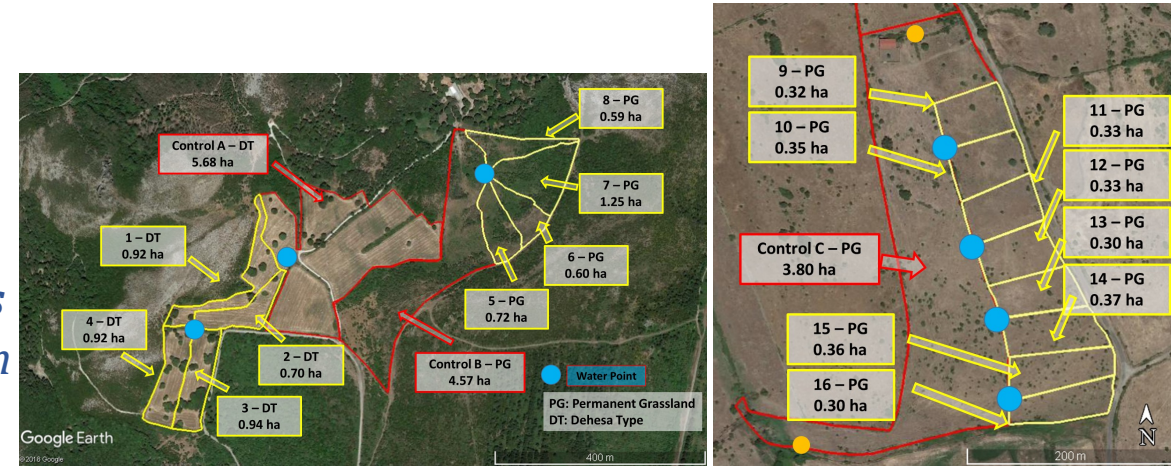

LIFE REGENERATE

Budget Total: 2.209.203 €
EU Grant: 1.306.117 € (60%)
Duration:
01/09/2017 – 31/05/2022

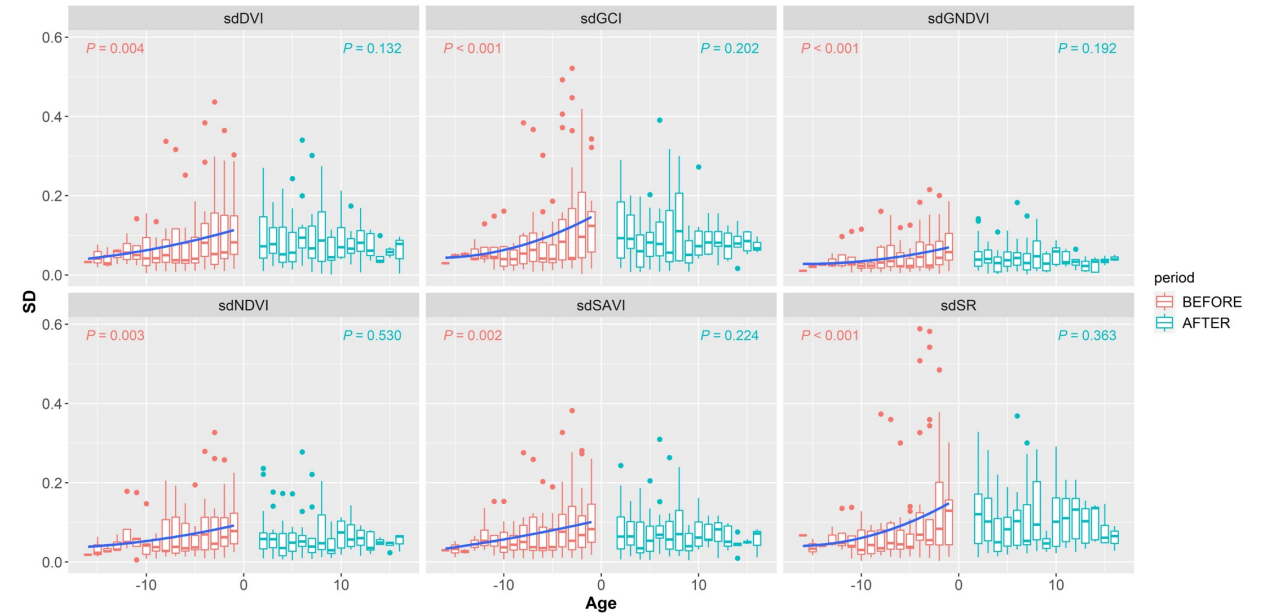

• **IMPLEMENTATION ACTIVITIES**

- A. Innovative grazing systems to enhance grassland productivity and quality and improve the forage provisioning of the farms
- B. Improved forest, vegetation, cropland, pasture trials
- C. Improving tree health and strength by truffle inoculation

Frongia et al. 2023 (in preparation)

B

Pulina et al. 2023 (Agric Ecosyst Environ)

Policy implications:

- *To identify indicators for assessing ecosystem services provision under different management practices and inform policy decision making*
- *To mitigate wildfire risks through rotational grazing and/or targeted grazing*
- *To support policy decisions for planning grazing management in public areas*
- *To showcase how effective grazing management can promote the maintenance of protected habitats (e.g. wooded grasslands) that are under threat in Mediterranean areas*
