

Welcome to the special edition newsletter of LIFE PASTORALP project!

The new project videos are online

Three new videos dealing with the themes, aims and results of the project have just been published online (on the project's YouTube channel, on the PASTORALP website, and on some channels of the partners involved).

It consists of **two life-stories videos** and **an illustrative** video. The first two are explanatory of the actions carried out within the two reference parks (Gran Paradiso National Park and Parc National des Ecrins). Moreover, these videos contain interviews with people directly involved in the management of pastures highlighting their perspectives on project themes such as climate change and alpine ecosystem management. The third is an explanatory video that, using animations and infographics easily accessible even by a non-specialist audience, illustrates the objectives, activities and results achieved and expected from our project.

All videos are subtitled in Italian, French and English.
